Garden Club Newsletter

This week:

Garden Club began working on researching more about our seeds. Student's graphed their seed growth over the last three weeks. We made "seed packets" for our seeds as well.

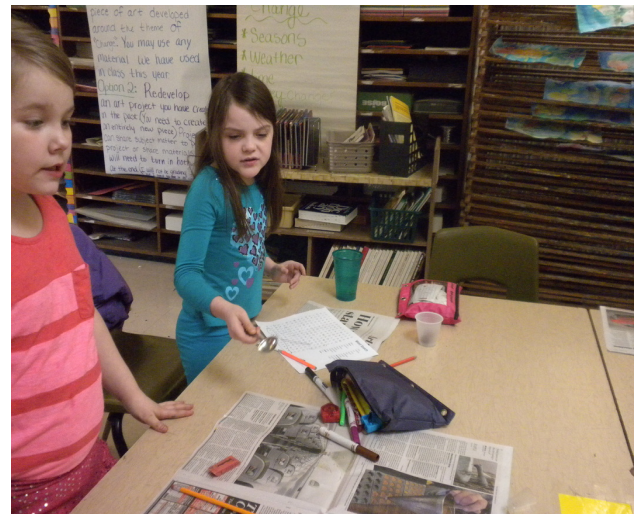

Over the next few weeks, we will be working on researching butterfly lifecycle, to prepare for our butterfly garden. We will begin planting in May, along with mulching and planting our vegetable plants. We will have a busy spring!

Independent Project
Option 1: Create a piece of art developed around the theme "Change". You may use material we have in class this year.
Option 2: Redevelop an art project you did in the past. You need an entirely new piece. You can share subject matter from a past project or share material that will need to be turned in at the end of the year.
