

February

4th, 2014

This week:

It was nice to see our garden club this week! With our snow days last week, we had some catching up to do this week with our gardening!

Students continued to work on their grass plants this week. We recorded our observations in a booklet and described how it changed. Garden club students also cut out faces to put on their plants!

During our winter months, the garden club has been having fun finding crafts and other activities to learn about! Next week, we are going to do some fun activities for Valentine's Day. We are going to have a cookie decorating day on **February 18th. Garden club will be canceled next week due to a meeting.** If anyone would like to donate juice boxes or other snacks, please let me know! It is always exciting to have fun events with the students. I appreciate all your help to make the garden club a memorable one for your child!

Remember to view our garden club website!
