WINTER FUN

This week:

Students had fun planting this week!

We made “grass plants” in class today.

The children decorated a cup with a fact, put in potting soil and planted grass seeds. We are going to watch the grass grow over the next few weeks.

News:

*Remember to check out our garden club website. I update pictures weekly onto this site!

<http://maplegardenclub.weebly.com>

I really enjoy working with your children every week! I am excited to announce that we will be creating a school butterfly garden this spring. We will begin some planning for this garden in the next few months.
