

## Garden Club Newsletter

### This week:

Garden Club had a lot of fun planting seeds this week!! We are learning to sow seeds, and how to plant them indoors. Our goal is to have a Maple Vegetable Garden this spring. Students will learn the proper way to transplant the seeds to our garden.

While waiting for their chance to plant seeds, students learned more about their groups plant by looking through the books taken out from our school library!

Last week we enjoyed the Valentine's Day Party. This was postponed due to the snow day! A special thank you to the families that donated items for this. Without your help, this wouldn't have been possible!

Thank you to Matthew's family for sharing a new plant to observe! We now have a callo lilly! If you have any gardening supplies that you no longer use, feel free to let me know. One item that would be helpful for our students are some pots to plant flowers and vegetables in.

**Remember to view our  
garden club website!**
