Garden Club Newsletter

This week:

Students had fun doing a butterfly scavenger hunt outside today. We learned all about butterflies, and were introduced to our new caterpillars. Students will be observing 10 painted lady caterpillars grow and turn into butterflies!

Next week we will begin planting some things into our butterfly garden! We are very excited to get our garden under way!

Please fill out the invitation to the final garden club where we will show everyone our new garden and become a Wild School Site! We will meet someone from the Ohio Division of Wildlife, who will present us with a certificate.
